

Wireless Temperature Detector

Specifications

Function	Model	MD-240R
Voltage		3V(2pcsX AA battery)
Static Voltage		≤10Ua
Working current		Standby current less than 10uA, alarm current 30mA
RF emitting frequency		433MHz
Wireless communication distance		≥100M(visual range)
Alarm temperature upper limitation range		40° C-80° C(104° F-176° F)
SWL		Fahrenheit display(on status) Celsius display (off status)
Alarm volume		85 db at 10 feet
Relatively humidity		10-95%
Install height		below 4M

Features | MODEL:MD-240R

- LCD screen display the temperature;
- Alarm with sound and light when exceed the set temperature;
- Commonly used to the hotel rooms, recreational sites. Workshops, machine rooms, cybercafe etc.
