

## Wireless Repeater

### Specifications

Function \ Model	PB-205R
Input Voltage	12v
Wireless receiving distance	120m(open area)
Static state current	≤25mA
Wireless transmitting distance	≤1000m(open area)
Wireless transmitting current	130mA
Appearance(L*W*H)	167*112*40mm

### Features | MODEL:PB-205R

- PB-205R is used to transfer wireless signal when distance between detector and control panel. Detectors can be connected with the repeater by learning code. It can transfer at almost 60 detectors signal.
